

4/24/2023

Members,

We are required to monitor your drinking water for specific contaminants on a regular basis.

Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During July 2022-December 2022 we did not complete all monitoring or testing for contaminants and therefore cannot be sure of the quality of your drinking water during that time.

The table below list the contaminants we did not properly test for during the last year, how often we are supposed to sample for Water Quality Parameters, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow -up were taken.

Contaminant	Required sampling Frequency	Number samples taken	When samples should have been taken	When samples were or will be taken
Water quality parameters	9 samples	9	July- December 2022	9/14/2022 Taken
Distribution system				
Water quality parameters	9 samples	9	July- December 2022	12/28/2022 Taken
Entry Points to the Distribution system				

Ramey Water Supply Corporation did scheduling Water Quality Parameter samples for the Texas Commission of Environmental Quality (TCEQ) for the 3rd and 4th quarter of 2022. **The report that was sent in to TCEQ was not filled out correctly.** After TCEQ reviewed the information, they issued Ramey Water Supply Corporation with a violation. We are required to let our customers know this information. If you have any questions, please contact our office at 903-569-6502.

Sincerely,

Ramey Water Supply Corporation
